News from the Center for Global Trade Analysis:

2015 Short Course in Dynamic Global Trade Analysis "Dynamic Modeling and Applications in Global Economic Analysis"

The Center for Global Trade Analysis, in the Department of Agricultural Economics, recently held the 2015 Short Course in Dynamic Global Trade Analysis from October 9-13, 2015 on the campus of Purdue University.

The Short Course in Dynamic Global Trade Analysis is a long-standing, educational offering by the Center for Global Trade Analysis which aims to introduce participants to a dynamic model designed for conducting global trade analysis in an applied general equilibrium setting; provide participants with ample hands-on training with software that has been tailored for undertaking analysis using a dynamic recursive model; and give participants the opportunity to interact with

economists working on global trade and resource use issues using a dynamic modeling framework. In total, 16 individuals from 11 different countries representing government offices, international agencies, the private sector and academia participated in this course.
